UM CINEMA COMPETITION: Experimental

Write and Direct your own Experimental project

Experimental film is often characterized by the absence of linear narrative, the use of various abstracting techniques -- out-of-focus, painting or scratching on film, rapid editing. The goal is often to place the viewer in a more active and more thoughtful relationship to the film.

Application Instructions:

Write a script for a Experimental project. Two production prizes will be awarded to experimental projects this year:

Two awards of $150 for projects 15 minutes or less.

Submit the following items in this order:
1) Typewritten Proposal, double-spaced, describing how you intend to realize your vision of your Experimental project as Director. Include your name, major, preferred phone and email.
2) A copy of your screenplay, typewritten, in proper format.
3) Storyboards.
4) Typewritten Budget Proposal describing how you would spend $150 to realize your project.

Please submit completed application packets in the physical DROP BOX located in Isom 110, during regular hours (M-F 8am-5pm).

APPLICATION PACKETS DUE BEFORE 4PM ON MONDAY NOVEMBER 2, 2015

WINNERS ANNOUNCED WEDNESDAY NOVEMBER 18, 2015
